STATINTL

Central Intelligence Agency
Washington D. C. 20505
ATTN: Mr. Richard Helms

Dear Mr. Helms,

We have associated ourselves with a man who by his own admission was approached by your organization to help you due to his worldwide travel and intimate unobtrusive association with key world figures. He refused to work with your organization. We feel that it would be worth your time to meet with us and discuss this further as our current and future position puts us in an excellent position to aid you with this man's needed talents.

Reference to our letter, to you, dated 30 Sept 68 would no doubt be helpful in explaining this contact. We would also like to reiterate that we can be of service to you in any way you might wish and a further discussion of our needs to clarify how we might aid each other would be in order.

We will be looking forward to an early reply.

STATINTL

Sincerely yours,

AK2

30 September 1968

STATINTL

Central Intelligence Agency
Washington D. C.
20505
ATTN: Mr. Richard Helms

Gentlemen;

We are putting together an extensive world wide aircraft, automobile, and business combine that we feel offers a unique opportunity for C.I.A. activities. Although we do not know the current plans or activities of the C.I.A. we will list the areas we will be in, the plus factors of the business, and a brief explanation as to why it would be advantageous for the C.I.A.

I. We will have a locally based dual Piper aircraft dealership at [redacted] STATINTL with world wide jet and used aircraft sales. In addition we will retrofit ex military aircraft, custom appoint private and business aircraft, and develop new ideas. In this phase of our operation we will of necessity be delivering and picking up airplanes all over the world, we will have pilots qualified in a multitude of different types of aircraft, offer charter service anywhere in the world and be capable of training any qualified individual in any piston or jet powered aircraft or helicopter.

II. We will have an automobile and aircraft accessory manufacturing facility at [redacted] that will STATINTL market world wide and work hand in hand with our aircraft division in that the markets will cover the same areas with the most unique and aggressive sales program ever devised. Development of all products will be done on our aircraft and cars.

III. We will have an Insurance and Finance organization to arrange financing for single and multiple sales of aircraft and provide insurance of all types.

IV. Design and styling consultants for all industrial products on an international basis.

AK3.

-2-

Our operation as planned will make it possible to serve C.I.A. in the following areas;

1. Transportation anywhere in the world. No matter the location there are desirable aircraft to be bought and sold and we can justify transporting and/or picking up someone for C.I.A. in this way.
2. Offer unprecedeted business cover almost anywhere in the world for whatever C.I.A. activities might be required.
3. Provide inconspicuous meeting places at our transient executive homes and offices in Colorado, Mexico, South America, Canada, Australia, and Europe.
4. We have over three-thousand intimate, carefully cultivated world wide contacts in all walks of life to aid our business that very easily could provide C.I.A. with an intelligence network not now available to this extent. These would include a number of college and university students, people in business, education, government, politics, military, and miscellaneous areas with special emphasis on Thailand, Laos, Mexico, South America, Germany, France, England, Australia, and the mid east.
5. Because of our extensive operations we could provide C.I.A. with an unnoticed recruitment program that would simply be a complement to our own hiring program. Along with this we will be maintaining files on potential customers, people with desirable talents, pilots, etc., and we could very easily be classifying people with desirable C.I.A. talents. Several of our own people have bilingual talents and are extremely capable.
6. We will have available numerous aircraft for any capability required at a moments notice for mobilization anywhere in the world.
7. Our world wide operations and multi-thousand contact organization offers an unequaled communications network.
8. We will be constantly collecting and maintaining all types of information and filing it in classified form to aid us in running our business, aid us in research, marketing, hiring, expansion, aid us in keeping abreast of political changes that might affect the business, and any other data that could be of aid in any way.

AK4

-3-

9. This will be a unique, profit making business that would offer a cover of a lasting nature, offer mobility, and anonymity never before available with data available for almost any need that might arise and with lodging available for meetings or whatever the occasion might require.

We will maintain all of our held companies under the holding company title of [redacted] and STATINTL have holding company headquarters in a private mansion that will offer privacy and complete facilities for conferences, STATINTL planning, transient executive housing, and security for the valuable filing maintained by us. There will be five held companies under the [redacted]

[redacted]

We are sincerely convinced that what we are offering is an extremely desirable plan that would more than double current C.I.A. effectiveness at no increase in annual expenditure. There are and will be but two people in our organization aware of this plan. With everything in mind we would very much like to discuss further this plan with a C.I.A. representative of STATINTL authority at the earliest possible time. We can be reached by phone at the following numbers; [redacted] between the Mountain Daylight hours of 00:45 to 15:30 and at phone [redacted] between the Mountain Daylight hours of 16:00 to 00:30.

We will be looking forward to an early meeting with C.I.A. and until then we remain;

Sincerely yours,

[redacted] STATINTL

Defense Intelligence Agency
Washington, District of Columbia 20500

Dear Counsel Houston:

I am doing a Research Project
on the Legal Aspects of Intelligence
and Counter-Intelligence for the
Chancellor of Northwestern University.
I Roscoe Miller, M.D. Ph.D.

Would you please advise me of
the authoritative sources on this
subject and provide me with
some tips on researching this
project if possible.

STATINTL

STATINTL

Respectfully submitted

9 June 1970

STATINTL

STATINTL

Dear Mr. [redacted]

With reference to your letter requesting assistance on a research project on the legal aspects of intelligence, it would be difficult to be truly helpful unless I knew the particular aspect of intelligence and the law in which you are interested.

On the general subject of U. S. intelligence, there is, of course, section 102 of the National Security Act of 1947, 50 U. S. C. 401 et seq., which established the Central Intelligence Agency. There are espionage laws designed to protect classified information against foreign intelligence as in 18 U. S. C. 793, 794, 798. There is also a certain body of law having to do with intelligence activities and their relation to international law, and most of the background and writing is found in various law review articles and international law journals.

Perhaps you have still other aspects in mind, but without knowing more I do not feel I can be specific.

Sincerely,

s/

THE CURIOUS SPY

Polish-born Anson Bolda was reputedly the son of a witch, a man who couldn't be killed.

But why would an old-world superstition concern the 20th-century C.I.A.?

Bolda's first mission to Poland, his capture and release from a Soviet prison, and his subsequent treatment at the hands of his superiors in Washington seem to be links in a chain meant to crush him.

Why? Is he being tested by the C.I.A.?

Or sold out?

Printed in U.S.A.

STATINTL

Dear Mrs. [redacted]

Mr. Helms has asked me to respond to your letter of May 15, 1970.

I, too, subscribe to the Jeffersonian philosophy of an informed electorate, but history indicates that even Mr. Jefferson, as President, found it necessary to withhold some information from public disclosure.

There is a long history of such security practices, dating from President Washington's time to the present. It is now formalized in Executive Order 10501, which makes the head of each department and agency responsible for information under his jurisdiction which is classified in the national interest. It is also recognized in the Freedom of Information bill, which was enacted several years ago and was designed to make the Government disclose the maximum of information to the public but which specifically exempted classified information.

Since the briefings given to the Attorney General are necessarily highly classified, they cannot be given to the general public. I maintain, however, that the American public is not only well informed but is the best informed electorate in the world today.

Sincerely,

s/

STATINTL

Lawrence R. Houston
General Counsel
Central Intelligence Agency

Dear Mr. Houston:

I have chosen to respond to your answer to my wife's criticism of Mr. Helms which resulted from his part in the murder of four American college students at Kent State by the National Guard. I do so because I see that your ignorance or your dishonesty prevents you from discussing this event as it actually happened.

My wife and I are aware of the fact that Mr. Helms acted as one of those "advisors" to President Nixon who decided the course of United States policy in Cambodia. We are also aware of the fact that the new government of Cambodia was illegally placed in power largely by the efforts of the CIA. Since the protests at Kent State, which brought about the murders of those four students by forces which represent the government of the United States, were protests against United States involvement in Cambodia, the CIA is obviously directly responsible for those murders.

It is thoroughly asinine for anyone to assert, as you do in your letter, that the wars in Cambodia, Viet-Nam, Laos, and Thailand have "nothing to do with problems of campuses, riots, and control of crowds." We can never accept the position that you had "nothing whatsoever to do with the tragic Kent State deaths." On the contrary, we repeat that we, as citizens of the United States, hold you directly responsible, not only for the Kent State murders, but for the thousands upon thousands of murders to which your agency has contributed in recent years.

There is no way of stopping dissent in this country without first stopping the murders which are produced out of your idiocy and the idiocy of the madmen in the Pentagon and the White House. Many American citizens know what you are doing, even if you yourself do not, and they are very angry.

Sincerely,

STATINTL

of May 8, 1970.

Let me explain a bit about the function of this Agency. As you probably know, our primary duty is to furnish foreign intelligence information and estimates on foreign developments to the policymakers of Government. We are specifically prohibited from any internal-security activities and consequently are not directly involved in domestic matters. All of us who make up the staff of the Agency are, of course, personally concerned with the serious problems confronting our country, both domestic and foreign, but in view of its basic role, the Agency as such can have little impact on the domestic side. Obviously, intelligence contributes to the formulation of policy, but if we are to maintain our standards of objectivity we cannot and should not play a decisive role.

The Government is made up of many components, each with its particular statutory responsibilities and limitations on those responsibilities, and that is why I feel that the private citizen's best chance of influencing the course of Government is through his elective representatives in the Congress.

Sincerely,

STATINTL

STATINTL

Dear Mrs. [redacted]

Mr. Helms has asked me to respond to your note of May 8, 1970, about the death of the students at Kent State University.

We share your distress and dismay about this episode, but we are concerned that you somehow associate this Agency with the event. We are prohibited by law from becoming involved in domestic affairs and certainly have nothing to do with problems of campuses, riots, and control of crowds. I trust, therefore, you will accept that we had nothing whatsoever to do with the tragic Kent State deaths.

Sincerely,

s/

Dear Mrs. [redacted]

Mr. Helms has asked me to respond to your letter of May 10, 1970, inquiring about a statement made by Professor Scott at the Berkeley campus of the University of California.

Specifically, I am not aware of publication through any of the media of a story resembling that reportedly given by Professor Scott. So far as I can determine, we have not been told that such a story was circulating. We are, of course, aware that all sorts of speculation and conjecture appear one place or another about alleged activities of this Agency. Experience has led us to respond to inquiries in connection with such stories with "no comment." However, I would like to thank you for bringing this particular allegation to our attention.

Sincerely,

STATINTL

Dear Mrs. [redacted]

Mr. Helms has asked me to respond to your thoughtful letter of May 9, 1970.

Despite what you have been told by your representatives in the Congress, I still believe that the most efficient way for an individual citizen to express his views is through the vote. In this connection, let me explain a bit about the function of this Agency. As you probably know, our primary duty is to furnish foreign intelligence information and estimates on foreign developments to the policymakers of Government. We are specifically prohibited from any internal-security activities and consequently are not directly involved in domestic matters. All of us who make up the staff of the Agency are, of course, personally concerned with the serious problems confronting our country, both domestic and foreign, but in view of its basic role, the Agency as such can have little impact on the domestic side. Obviously, intelligence contributes to the formulation of policy, but if we are to maintain our standards of objectivity we cannot and should not play a decisive role.

The Government is made up of many components, each with its particular statutory responsibilities and limitations on those responsibilities, and that is why I feel, as I said in opening, that the private citizen's best chance of influencing the course of Government is through his elective representatives in the Congress.

Sincerely,

s/

Dear Miss [redacted]

Mr. Helms has asked me to respond to your letter of May 8, 1970. I note you refer to the Senate amendment to the military act and believe the private citizen can best attempt to influence affairs through his representatives in the Congress.

Let me explain a bit about the function of this Agency. As you probably know, our primary duty is to furnish foreign intelligence information and estimates on foreign developments to the policymakers of Government. We are specifically prohibited from any internal-security activities and consequently are not directly involved in domestic matters. All of us who make up the staff of the Agency are, of course, personally concerned with the serious problems confronting our country, both domestic and foreign, but in view of the basic role of the Agency, it can have little impact on the domestic side. Obviously, intelligence contributes to the formulation of policy, but if we are to maintain our standards of objectivity we cannot and should not play a decisive role.

The Government is made up of many components, each with its particular statutory responsibilities and limitations on those responsibilities. That is why I feel, as I said in opening, the private citizen's best chance of influencing the course of Government is through his representatives in the Congress.
